SUMMARY

Frontend engineer with 7 years of experience building fast, accessible web applications for healthcare and fintech teams. Comfortable owning features end to end, from design review to production monitoring.

EXPERIENCE

Frontend Engineer — Cascadia Clinics Software 2021 – Present

- Led the migration of the appointment booking app from AngularJS to React and TypeScript, cutting bundle size by 38%
- Built a shared component library and design system used by 4 product teams, with WCAG 2.1 AA accessibility
- Improved Largest Contentful Paint from 3.9s to 1.7s by code splitting and image optimization
- Introduced Playwright end-to-end tests and Jest unit tests in the GitHub Actions pipeline, raising coverage to 82%
- Mentored three junior developers through weekly pairing and code reviews

Web Developer — Northwind Payments 2018 – 2021

- Developed customer dashboards in Vue.js and Node.js backed by REST APIs and PostgreSQL
- Worked in a Scrum team of eight; ran sprint demos for stakeholders
- Deployed services on Azure and set up monitoring with Grafana
- Organized the company's volunteer day with the local food bank

SKILLS

- Languages: JavaScript, TypeScript, HTML, CSS, Python
- Frameworks: React, Redux, Vue.js, Node.js, Express
- Tools: Git, Docker, Figma, Jira, Webpack

EDUCATION

B.S. Computer Science, Oregon State University 2014 – 2018
